Marcell 850

For heavy duty applications

Reduce emissions, decarbonize your engine and save fuel

- A fuel economy of up to 25%
- An increase in torque of up to 10%
- A reduction in exhaust emissions of up to 70%
- Better handling and mechanical performance
- A continuous maintenance of your vehicle's engine
- A 5 year manufacturer warranty on all of our products

Marcell : Motorized Alternative Refuel Cell

The Marcell 850 is specifically designed for the commercial market; it is adapted for large and heavy duty motors, as well as for construction and agricultural machinery.

- Developed for 4.5L to 8.5L engines [12 Volts]
- Cell dimensions : LxWxD 190x190x100 mm
- Number of steel plates : 17
- Tank dimensions 1.5L : LxWxD 200x240x90 mm [dimensions include the cap]
- Larger volume reservoirs are available

The Marcell 850 is supplied with all its components ready to install. It comprises of : the cell, the wiring, our custom water reservoir, a relay, the terminals, the fuse, the couplings [steel], the hoses and a dose of electrolytes. The demineralised water is supplied for the first year.

The Marcell 850 comes with its own Pulse Width Modulator [PWM] with a built-in digital display. It has been specifically developed for this kit and can be placed in the passenger compartment. If required, a watertight protective case will be supplied.
